
Summary

What is recycling?

- It is reusing materials to make new containers and boxes etc.
- thing that we can use again
- it is re using materials instead of throwing them away
- reusing materials , and improving our enviroment by doing so.
- Is used things that can be reused
- reusing things like bottles
- recycling is when something is used more than once /milk carton machines turn them into something else
- it is putting things in the right bins
- Recycling is throwing away stuff what are empty.
- when you use paper on both sides and instead of burning it you recycle it and if you do that you could turn it into a pencil.
